

Copyright Policy

Copyright and trademark infringement is the uploading, e-mailing, posting or hosting of any files that contain software, video, music or any other material protected by intellectual property laws, rights of privacy or publicity, copyright, trademark, patent, trade secret, or any other applicable law unless you own or control the rights thereto or have received the proper consent. It is our duty as an Internet Service Provider (ISP) to comply with the Digital Millennium Copyright Act (DMCA), a law enacted by Congress in 1998 to help limit and prevent the illegal acquisition of copyrighted material.

At any time, the copyright holder or owner of the material may pursue legal action in which S&A Communications will perform a best effort attempt to identify the account responsible for illegal online activity. Any violation of these terms may result in one or more of the following actions, a written warning to cease illegal online activity; suspension and up to termination of user's account, legal action and/or reporting the violation to law enforcement authorities. A reconnection fee will apply to restore service.
